TIME:

01:30 PM

FACILITATOR:

Opus Technology limited

IN ATTENDANCE FROM OPUS

1. Nazmus Sakib Siraji

ATTENDANCE FROM OUI

2. Brother Razali

TOPIC

DASHBOARD MEETING FOR OUI ZAKAT POS

DISCUSSION**1. Mobile App:**

- In hawker registration, we must add another field for hawker type.
- Both hawker and car wash user should be able to operate in app business without internet. For example, if a hawker or car wash user doesn't have internet connection, s/he will be able to place order and insert product and when s/he will connect to the internet the data will automatically be fetched and merged in the cloud database.

2. Admin Dashboard (Web):

- There should be an option to sort the hawker and car wash list according to the following attributes:
 - Name
 - Hawker Type (If the user is a hawker, not applicable for car wash)
 - Area
 - Total Sales Amount
- Admin should have the option to register new hawker or car wash.
